

Join us in making a Sea Change

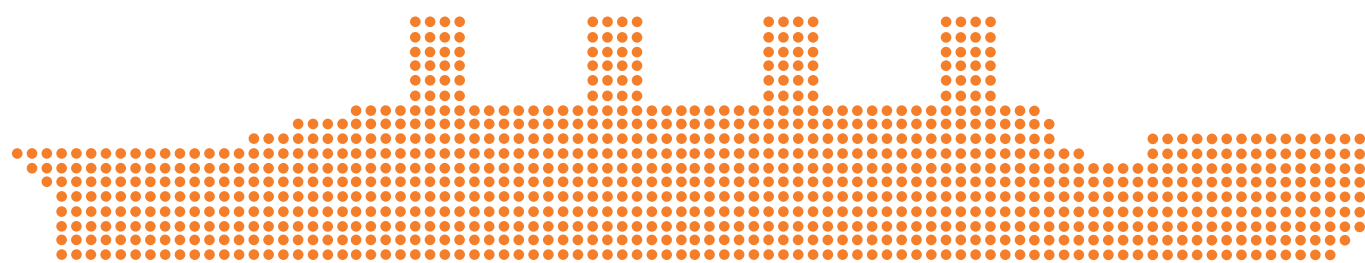

Beneath the ocean's surface lies a deep problem...

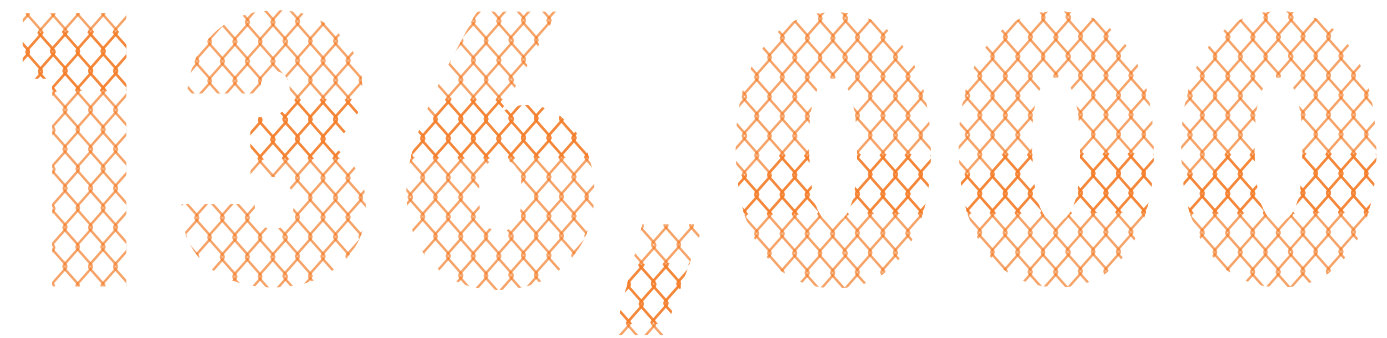

Every year, 640,000 tonnes of ghost fishing gear is lost or discarded in our oceans.

Nets, lines and traps become floating death traps, entangling our marine animals.

Combined, it weighs more than the RMS Titanic.

More than 136,000 seals and whales are trapped every year.

World Animal Protection commits to saving 1 million marine animals by 2018 through the Sea Change campaign.
